Bringing Innovation Aboard: The First Nimbus Food Waste Digester Handover

August 11, 2023

Dear Valued Subscribers,

We are excited to bring you a momentous update from the world of sustainability and cutting-edge technology! Syker Systems, in collaboration with PT. IEM Industries Indonesia, is thrilled to announce the successful handover of the revolutionary Food Waste Digester, "Nimbus," to its inaugural recipient, the Fred Olsen Cruise Ship, in Liverpool, UK.

A Glimpse of the Future: Nimbus Food Waste Digester

The Nimbus Food Waste Digester marks a groundbreaking step in the fight against food waste and its environmental impact. This innovative solution, designed and engineered by the experts at Syker Systems, offers a sustainable and efficient way to manage food waste onboard ships, significantly reducing both environmental footprint and operational costs.

The Handover: Celebrating a Milestone

In a momentous event held at the manufacturing facility of PT. IEM Industries Indonesia, representatives from Syker Systems, including Director of Asia Sales Freedian Marpaung, and Directors from PT. IEM Industries Indonesia came together to commemorate the handover of the very first Nimbus Food Waste Digester.

"We are proud to see the Nimbus Food Waste Digester come to fruition after months of collaborative effort. This marks a significant step towards more sustainable practices within the cruise industry," shared Chuck Walls, CEO of Syker Systems Inc.

Towards a Greener Future: Fred Olsen Cruise Ship Adopts Nimbus

The Fred Olsen Cruise Ship, renowned for its commitment to sustainable tourism, has taken a pioneering step by integrating the Nimbus Food Waste Digester into its operations. The installation of Nimbus onboard will not only minimize the ship's environmental impact but also set a precedent for eco-conscious practices within the cruise industry.

"The adoption of the Nimbus Food Waste Digester aligns perfectly with our mission to deliver unforgettable cruising experiences in an environmentally responsible manner. We are excited to lead by example and contribute to a greener future," commented Captain Sarah Williams of Fred Olsen Cruise Lines.

What's Next?

With the successful handover of the first Nimbus Food Waste Digester, the partnership between Syker Systems and PT. IEM Industries Indonesia continues to gain momentum. The collaborative efforts aim to bring this revolutionary technology to more ships, industries, and communities worldwide.

Stay tuned for more updates as Nimbus sets sail on its mission to revolutionize waste management and pave the way for a sustainable future.

Thank you for your continued support in championing innovation, sustainability, and progress.

Warm regards,

The Syker Systems Team
